## OPTICS DECORATING LIABILITY WAIVER FORM

We at Hydro Print Services believe in the safety and quality of our customer's items during the refinishing process. As such, we present you with our Optics Waiver due to the excessive liability related with dipping any kind of optic. The turnout is typically amazing and actual failure rate is very low, but unfortunately due to some manufacturer's claims we must require this waiver be filled out and included with *any* optic to be customized.  
Thank you for your cooperation!

I acknowledge that with my signature below I am allowing Hydro Print Services to process and decorate my scope or other optic.

I understand that leaking, flooding, or lens coating damage may occur.

I do not hold Hydro Print Services responsible for any damage related to the decoration of my optic including that caused by submerging the optic in water, including but not limited to floding, water intrusion, or seal failure.

I further acknowledge that a representative from Hydro Print Services has explained the procedure for the decoration and I am willingly allowing this process to take place even though my scope may be permanently damaged.

I understand that scope manufacturers who make claims related to "waterproof," "water resistant," or "sealed" scopes may not have indicated a total submersion of their product in water as covered under any said claim.

I understand that if damage occurs, the manufacturer may or may not void the factory warranty. I also acknowledge that Hydro Print Services' warranty is limited to cosmetic defects in the applied finish only.

I give Hydro Print Services permission to decorate my scope and fully understand and accept the risks involved and I do not hold HPS liable for any damage that may result or be discovered during or after the processing.
